

Lead poisoning has been identified as the No. 1 preventable environmental threat to children in the U.S.
If your home was built before 1978, there is a good chance it has lead-based paint.

Give Your Child the Chance of a Lifetime

Even low levels of lead in the blood of children can result in:

- * Speech, language, and behavior problems
 - * Brain and nervous system damage
 - * Developmental delays
- * Learning disabilities, ADD, and decreased intelligence

Qualified Bucks Residents can receive Improvements to homes including new windows, doors, siding, trim, interior & exterior painting, porch repair, and other home safety measures.
