January 4, 2024

Dear Residents & Neighbors,

We are writing to let you know that there have been a few updates to the infiltration testing to take place on West Prospect Avenue. Unfortunately, both the timing and exact locations have had to be altered.

The infiltration test pits are now scheduled to take place on Thursday, January 11th, subject to weather and scheduling. We appreciate your patience while we coordinate with our engineers, subcontractors, PA One-Call and others.

In addition, the test pit locations have been altered slightly. This means that the most affected residents have also changed. The test pits are still to be located on the North side of Prospect Avenue. However, the test pit previously scheduled to be near the intersection of Hulmeville Avenue will now be located farther East in the right-of-way, likely in front of 308 West Prospect Ave. The test pit previously scheduled to be near the intersection of Hill Avenue (NW corner) will now be located at the NE corner, likely in the right-of-way in front of 206 West Prospect Ave.

There is no change to the location of the Pine Street test pits.

Please note, the testing is weather dependent. The tests will not be performed during rain events or immediately after heavy rain events, or when the temperature is below freezing. If unsuitable weather conditions are forecasted, and the tests need to be rescheduled, the Borough will be informed as soon as possible. The crew is expected to be on site between the hours of 7:00 AM – 4:00 PM.

We apologize for any additional disruption these changes have caused.

Thank you,

Langhorne Manor Borough Council
